DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the corsage, wristlet and bouquet must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3- 4,8 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (6,039,453).
3. Wang discloses at least one flower in a flower display a lighting device having a power source a light source driven by the power source to emit light and an array of optical fibers receiving light emitted by the light source the array of optical fibers transmitting the light to illuminate at lest one flower (figs 3,4); wherein the light source is a light emitting diode; a switch to turn the light source off and on; the light source has at least one battery (17); the flower display is a bouquet (fig 3).
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5-7,9,12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang as applied to claims 1 and 10 respectively above and below, and further in view of Post (5,727,577).

7. Wang discloses the instant invention except for the recitation of the flower display being a corsage, wristlet or boutonniere. Post discloses an optical ornament comprising an optical fiber lighting means having a fastening means such as a clip or the like for attaching the device to clothing, or any other object; a jewelry item that can take the forms including but not limited to personal adornment items including floral arrangements in which the radiating element is made to resemble parts of flowers (col.5-6 lines 20-24 and 9-16 respectively). It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement the teaching of Post to modify the optical fiber lighting device of Wang to include a fastening means to fasten the device to the aforementioned locations and to include the embodiment of personal adornment items including floral arrangements and flower shapes in the device of Wang for the purpose of providing Wang with a wearable embodiment.

8. Claims 2,10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang.

Wang discloses the claimed invention except for the recitation of an LED as the light source. The examiner takes Official Notice that the use of LEDs is old and well known in the illumination art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute an LED for the light source in the system of Wang. One would have been motivated since LEDs are recognized in the

Art Unit: 2875

illumination art to have many desirable advantages, including reduced size, high efficiency, low power consumption, long life, resistance to vibrations, and low heat production, over other light sources.
